

SAFE FILLING STATION

Safety filling stations are designed to provide a safe and efficient filling environment for SCBA (self-contained breathing apparatus) and SCUBA (self-contained underwater breathing apparatus) cylinders in the harshest conditions, with single, double or triple filling options.

MODEL	: FS Series
TYPE	: Panel
TUBE CAPACIYT	: 3 pcs.
FILLING HOSE	: 2 / 3
MAX. WORKING PRESSURE	: 310 bar
WEIGHT	: 415-500 kg
DIMENSIONS	: 990x600x1660 mm

STANDART EQUIPMENT

- Capable of filling up to 3 tubes at the same time
- Filling control panel with input and output pressure indicators
- Discharge Valve
- Conformity to NFPA 1901-2009
- Powder Coating
- Production with ISO 9001:2015 quality assurance
- Easy tube placement
- Door security lock
- Filling hose conforming to EN 144-2
- Adjustable regulator
- Yoke or DIN adapters for SCBA, SCUBA
- Safety valve

OPTIONAL EQUIPMENT

- Double pressure filling system
- Automatic cascade control system
