

SAFE FILLING STATION

Safety filling stations are designed to provide a safe and efficient filling environment for SCBA (self-contained breathing apparatus) and SCUBA (self-contained underwater breathing apparatus) cylinders in the harshest conditions, with single, double or triple filling options.

MODEL	: FSD Series
Type	: Panelsiz
TUBE CAPACITY	: 3 Pcs
FILLING HOSE	: 2 / 3
MAX.WORKING PRESSURE	: 310 Bar
WEIGHT	: 330-400 kg
DIMENSIONS	: 990x600x1260 mm

STANDART EQUIPMENT

Capable of filling up to 3 tubes at the same time
Filling control panel with manometer
Discharge Valve
Conformity to NFPA 1901-2009
Powder Coating
Production with ISO 9001:2015 quality assurance
Easy tube placement
Door security lock
Filling hose conforming to EN 144-2
Input pressure manometer
Tube pressure manometer
Safety Valve
